Lightening Round Essays

Jake McDonald

- If Anagha Rukimini Sikha doesn't earn an A, then nobody should, because she always went the extra mile with her work and helped the team out immensely.

- The most difficult part of the class was data wrangling because it was hard for me to visualize what I needed to do to the data set to get the information that I needed, as well as figuring out the code to perform it.

- The easiest part of the class was ggplot functions; they are very intuitive.

- The part of the class that that interested me the most was the regression analysis because of the power that they can provide for statisticians.

- I would tell them to stay on top of their work and to not get discouraged when they are stuck on a lab; it is a learning curve that is tough but will be rewarded in the end!
